

Expand your existing IT capabilities through CollectCloud®, Collectronics'® suite of applications available via the Internet. If you are seeking to improve your law firm's productivity without investing in costly new infrastructure, then our suite of online applications is your solution. As an SaaS (Software-as-a-Service) provider, Collectronics delivers its suite of online applications through your internet browser. This means you avoid the need for upfront investment in servers and other IT infrastructure costs associated with traditional software applications. Additionally, updates to our applications are made seamlessly, without the need to install updates directly onto your desktop or network server. For those seeking an alternative to paper files, the CollectCloud solution provides online storage of all your case files for easy access and retrieval from wherever you have internet access.

Collectronics is committed to ensuring the security of your data and accessibility to our applications from the Internet at all times. We utilize best practices to maintain the highest level of availability and quality control on all of our clients' applications. You can rest assured we have taken every precaution to protect your data. We back up your data in real-time to secure data facilities in two geographically diverse locations. Collectronics has been implementing secure cloud technology for its clients for over 10 years, and is constantly keeping up with the bleeding edge of cloud technology and virtualization. **We were in the cloud before the cloud was cool!** All of this, combined with unparalleled customer support, provides our clients with the tools necessary to efficiently and securely manage their collections practice.

The CollectCloud® suite of online applications includes:

CollectMinder® -

Assessment Collection Software for Community Associati

ProjectMinder® -

Project and Case Management Software for Community A

e-nForce® -
